

Packaging / Shipping Tips

Please Read Carefully Before Booking!

Last Updated: 05/01/2021

Baugh Deliveries Limited we always ensure your items are secure and protected throughout the journey.

However, we also need you to package your items to help us help you. We have compiled a nice little list to help get your items secure as possible for transit.

Bubble Wrap Roll

If you plan to ship fragile, easily breakable items, we recommend purchasing one of our bubble wrap products in addition to your cardboard packaging. Our large bubble wrap maybe used in a wide range of applications, from interior packaging support to external wrapping and cushioning.

Fragile Tape & Brown Parcel Tape

If you plan to ship fragile, easily breakable items, we recommend purchasing these roll of tapes as brown tape is excellent for strength, and fragile tape ensures fragile items remain with care during the transit and delivery.

Strong Cupboard Boxes

Ensures good protection during transit.

Side Note

Ensure to place an invoice, A4, or something with the full delivery address inside your parcel just in case the label on the outside gets damaged, wet, or unreadable.

This will ensure your item(s) are safe and secure during transit through to final delivery location.

We hope these little tips help. If like more information or still not clear email, us on bookings@baughdeliveries.co.uk, or call 07957148448 we be more than happy to help with any questions.
